Abstract
Effective teachers employ instructional strategies that enhance student engagement and can positively affect student learning. This qualitative study investigated the instructional practices and experiences of classroom teacher who implement music into the academic lesson to increase student engagement and enhance learning.

bias, and insensitivity. Studies have shown the number of years of instrumental music instruction and academic achievement in math, science and language arts are significantly connected. How Do We Integrate STEM and STEAM into a Packed Schedule? If you think the concept of STEM is great, but you have too much to do during your teaching day, you’re not alone. With a schedule to address language arts, math, science and social studies, how could you fit anything else in? There are different ways to integrate this type of teaching, but the first step is to change your mindset about STEM being a new subject. Here are links to more activities you can use for STEM integration in the classroom: Going Beyond Mini-STEM Challenges. Providing your students the chance to participate in mini-STEM Challenges gives them the foundation for becoming better thinkers. However, there are many ways you can integrate this learning into your other subject areas. Creativity and the Arts in the Primary School Discussion Document 1. Introduction 2. Creativity and the Arts in Education in Ireland 3. Support for Arts in the Primary School 4. Results of INTO Survey 2009 5. Discussion and Conclusion Bibliography. Part Two. Part one of this report contains the discussion paper prepared by the INTO Education Committee for the consultative conference held in November 2009 in Gorey, Co Wexford. Part two contains the main proceedings of the conference. A comprehensive arts education provides a rich and engaging curriculum that develops pupils’ abilities to think, reason and understand the world and its cultures. It offers pupils opportunities to respond, perform, and create in the arts.
