Are bikes the future of green transportation or just an elite hobby, a way to lure the rich back from the suburbs to the city center? Fleming suggests that private development in bike-friendly areas could potentially offset the costs of creating more and better bike paths. His embrace of post-industrial infrastructural landscape is as politically opportunistic as it is pragmatic: in these abandoned spaces bikers can find large, wide open spaces with little traffic, meaning bikers can travel for long distances with minimal encumbrance. He issues a useful challenge to urban designers to consider the next frontier in propelling biking from a marginal to a more practical form of transit.
